

D-Link[®] Quick Installation Guide

This product can be setup using any current web browser, i.e., Internet Explorer 6 or Netscape Navigator 7.0

DP-300U

D-Link Fast Ethernet
Print Server

Before You Begin

You will need an Ethernet-enabled device, such as a laptop or desktop computer and a USB or parallel-port printer that will connect to the DP-300U.

Important: TURN OFF the power to the printer before installing the DP-300U.

Check Your Package Contents

DP-300U Multi-Port Print Server

CD-ROM (Software, Manual and Warranty)

5V DC 2.5A Power Adapter

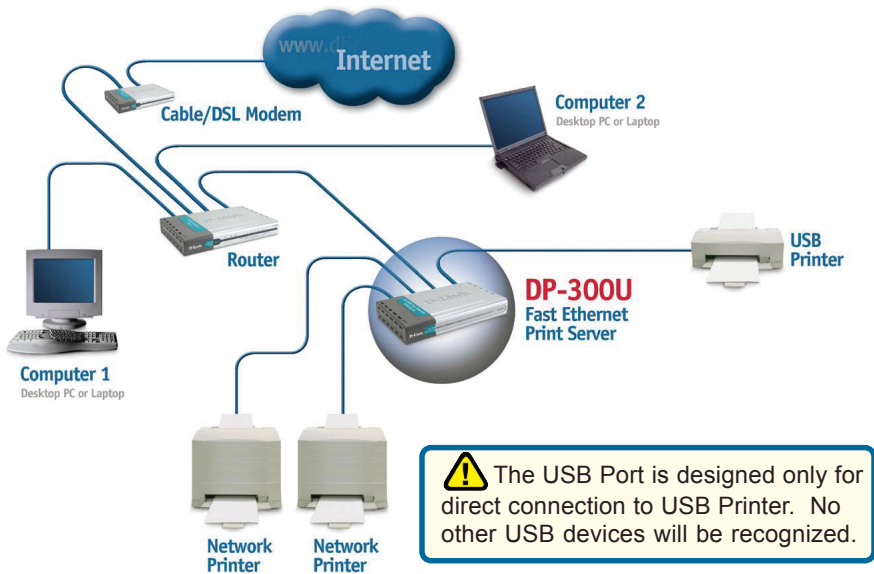

Using a power supply with a different voltage rating will damage this product and void its warranty.

If any of the above items are missing, please contact your reseller.

1

Connecting The DP-300U To Your Network

First, insert one end of a straight-through CAT5 Ethernet RJ-45 cable into the “**Network Port**” (shown below.) Connect the other end of the cable to the LAN port of the gateway or switch. *Note: Do not connect the power cord to the DP-300U until you are advised to do so*

Next, make sure that the Printer is turned **OFF**. Using the USB cable or printer cable, connect one end of the cable to the USB or parallel port of the DP-300U (shown below) and the other end to the USB or parallel port of the printer. Turn **ON** the printer.

Then, plug one end of the power adapter into the DP-300U and the other end into your electric outlet.

The DP-300U will turn on and begin a self-test.

Warning: For Mac OS printing, please refer to users manual located on CD-ROM.

2

Setting up your DP-300U for network printing in Windows XP

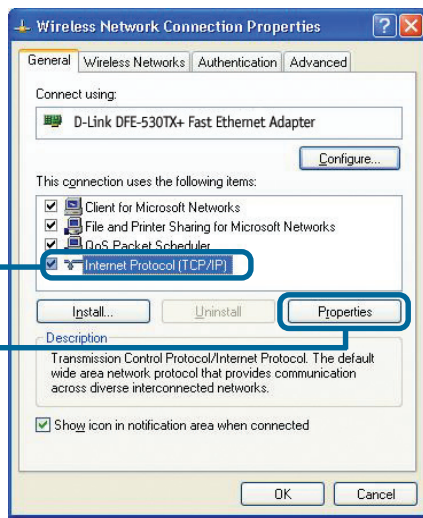

For additional Windows operating system setup or information on the web-management interface, refer to the manual located on the CD-ROM.

The factory default IP address of the DP-300U is 192.168.0.10. In order to print to the printer(s) through the DP-300U, the DP-300U must have the same IP network settings as your network. IP address can be assigned manually or automatically by DHCP, BOOTP or RARP. To access the print server's web configuration, manually assign an IP address on one of the PC's on your network to the same subnet as the print server.

Go to **Start > right click on My Network Places > select Properties > Double-click on the Network Connection** associated with your Network Adapter.

Click **Internet Protocol (TCP/IP)**

Click **Properties**

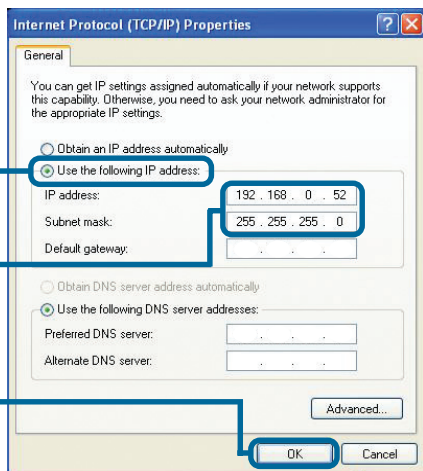

Input a static IP address in the same range as the print server.

Select **Use the following IP address**

IP address: **192.168.0.52**
Subnet mask: **255.255.255.0**

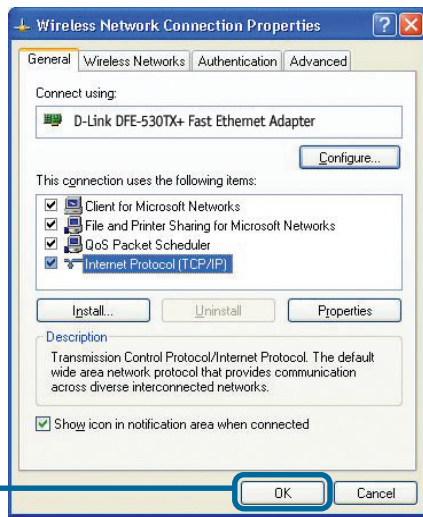

Click **OK**

2 Setting up your DP-300U for network printing in Windows XP (continued)

Click **OK** to apply IP address settings.

Click **OK**

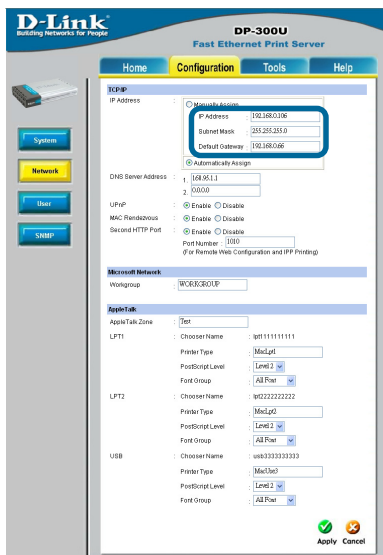

Using your web browser enter the IP address of the DP-300U. By default the IP address is set to **192.168.0.10**

The IP address of the DP-300U can be modified on the **Network** tab of the web configuration menu.

The following instructions use the print server's default IP address as an example. Make the appropriate changes if you modify the DP-300Us IP address.

2

Setting up your DP-300U for network printing in Windows XP (continued)

Click on the **Configuration** tab to view the current **Port Settings**.

Write down on a piece of paper the Port name that you wish to use.

For Windows XP:
Go to Start>Printers and Faxes>Add a Printer or Go to Start>Control Panel> Printers and Faxes

Double-click on the
“**Add Printer**” icon

Click **Next**

2

Setting up your DP-300U for network printing in Windows XP (continued)

Select “**Local Printer.**”

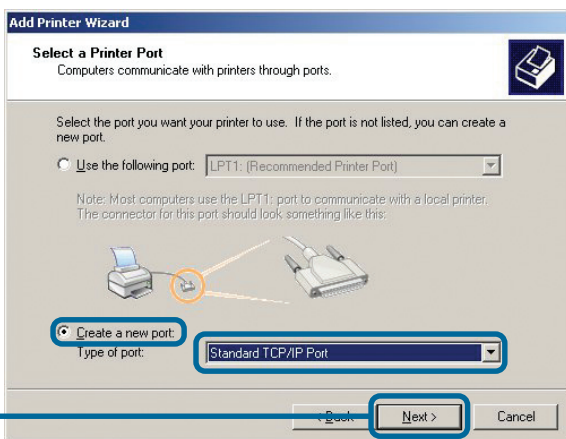

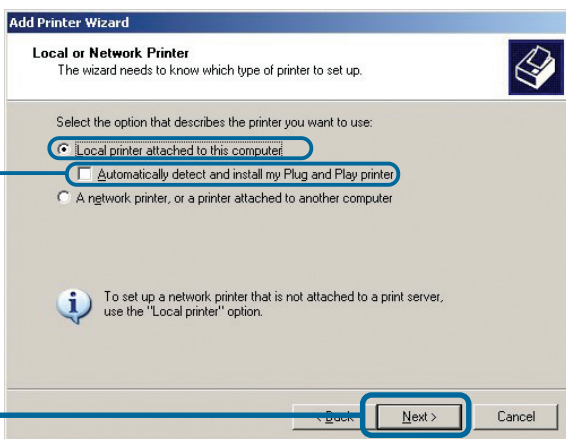

Please make sure to **deselect Automatically detect and install my Plug and Play printer.**

Click **Next**

Select “**Create a new port.**”
At the pull-down menu, highlight “**Standard TCP/IP Port.**”

Click **Next**

Click **Next**

2

Setting up your DP-300U for network printing in Windows XP (continued)

Type in the IP address of the print server. (i.e. 192.168.0.10)
The port name will automatically be filled in.

Click **Next**

 This may take a few seconds

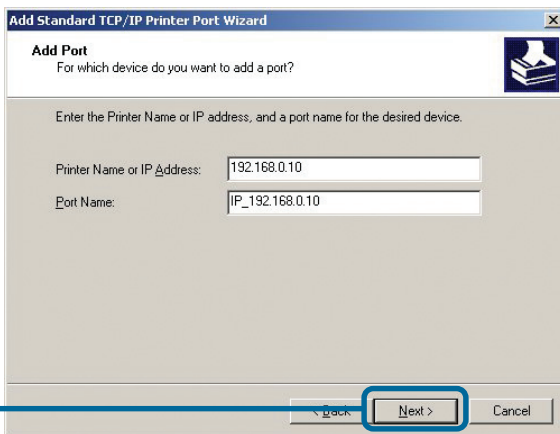

Select **“Custom”**
Then click on **Settings**.

Click **Settings**

Select **“LPR”**

Input the port name of the port being used by the printer

Click **OK**

Add Standard TCP/IP Printer Port Wizard

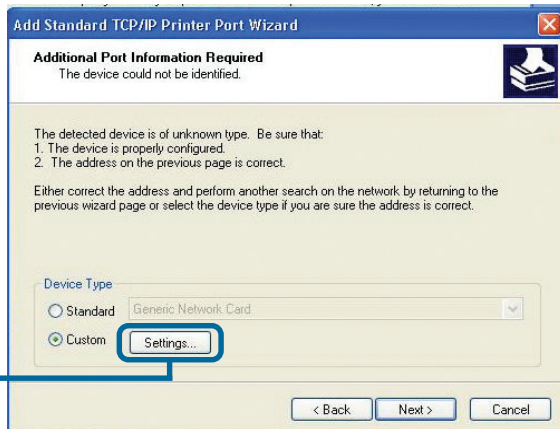

Add Port
For which device do you want to add a port?

Enter the Printer Name or IP address, and a port name for the desired device.

Printer Name or IP Address: 192.168.0.10

Port Name: IP_192.168.0.10

< Back Next > Cancel

Add Standard TCP/IP Printer Port Wizard

Additional Port Information Required
The device could not be identified.

The detected device is of unknown type. Be sure that:
1. The device is properly configured.
2. The address on the previous page is correct.

Either correct the address and perform another search on the network by returning to the previous wizard page or select the device type if you are sure the address is correct.
